### Step 1: Log into Amazon Account

Run SameMovie Amazon Video Downloader , then select the download site according to your account.

- For the United States account, please choose "Amazon US" as the download site.
- For Japan account, please select "Amazon Japan".
- For Germany account, please select "Amazon German".
- For United Kingdom account, please select "Amazon UK".
- For France, India, Canada, and others, please select "Prime Video".

Click on the **Profile** icon and choose **Sign In**, then a window will pop-up asking you to log in with Amazon account.

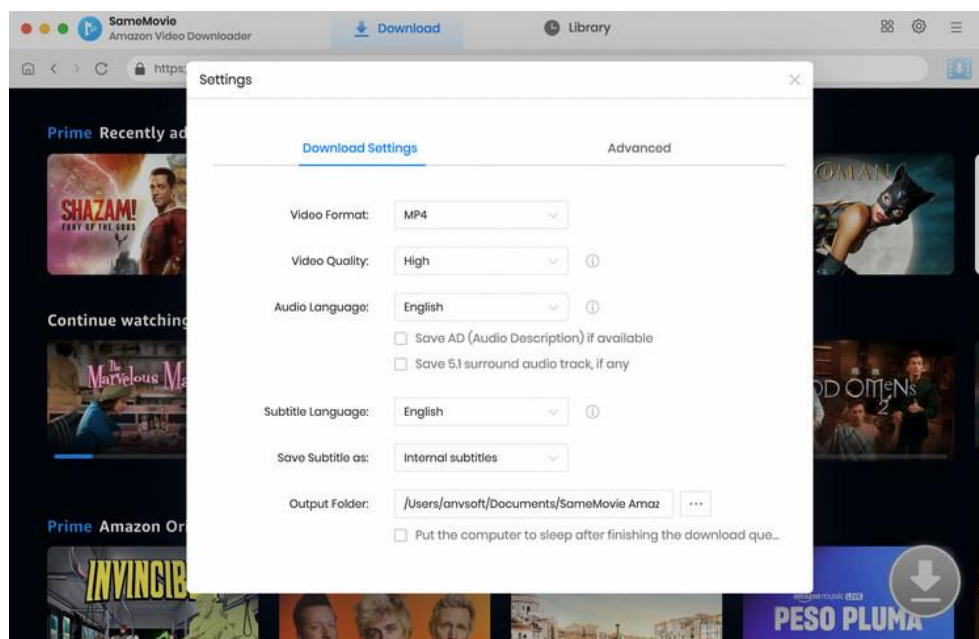

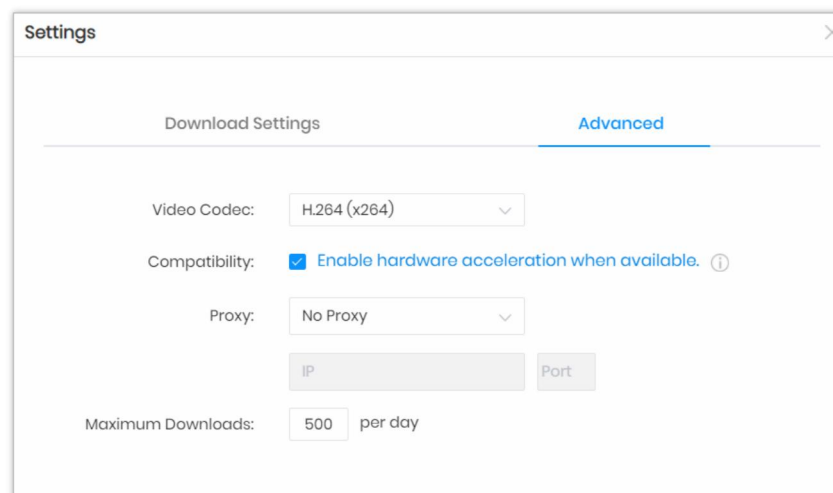

## Step 2: Customize Output Settings

Click the “**Setting**” icon on the upper right corner of the interface to choose the output settings. You can choose the video format (MP4 or MKV), video quality, the language of audio track and subtitle, the output path, and more. SameMovie offers three subtitles types for you to choose from:

- Internal subtitles: can save subtitles in multiple languages.
- External subtitles: can save subtitles as independent files, SRT file, so that you can edit them.
- Hardcode subtitles: can be permanently embedded into the video and subtitles are always available.

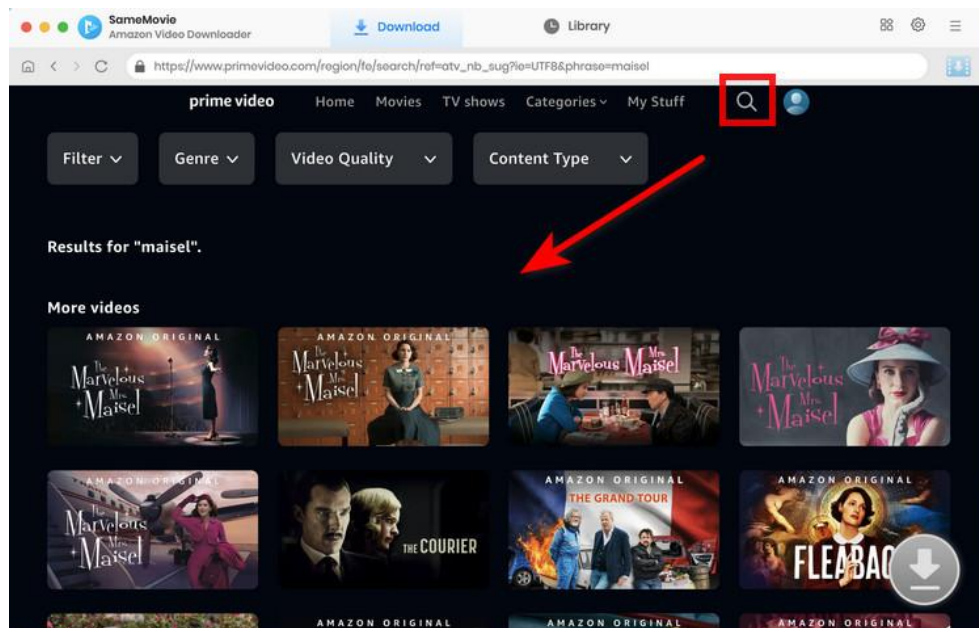

In the “**Advanced**” tab, it is available to choose H.265 and H.264 video codec. When selecting the H.264 video code, you can save the video with smaller files. You can also enable hardware acceleration, if available, to improve download performance by using the graphics card.

## Step 3: Search for Amazon Video

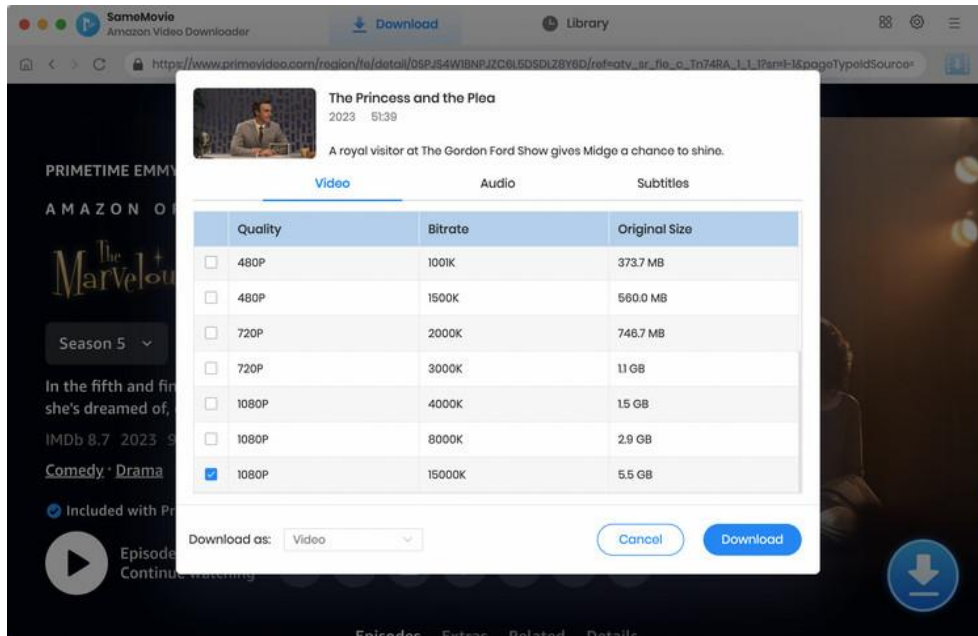

Enter the name or keywords of the desired video into the search bar, and hit Enter on the keyboard, and SameMovie will quickly show the results for you. Find the video, click on its thumbnail, and then the arrow icon will become available (blue).

## Step 4: Select Advanced Download Settings

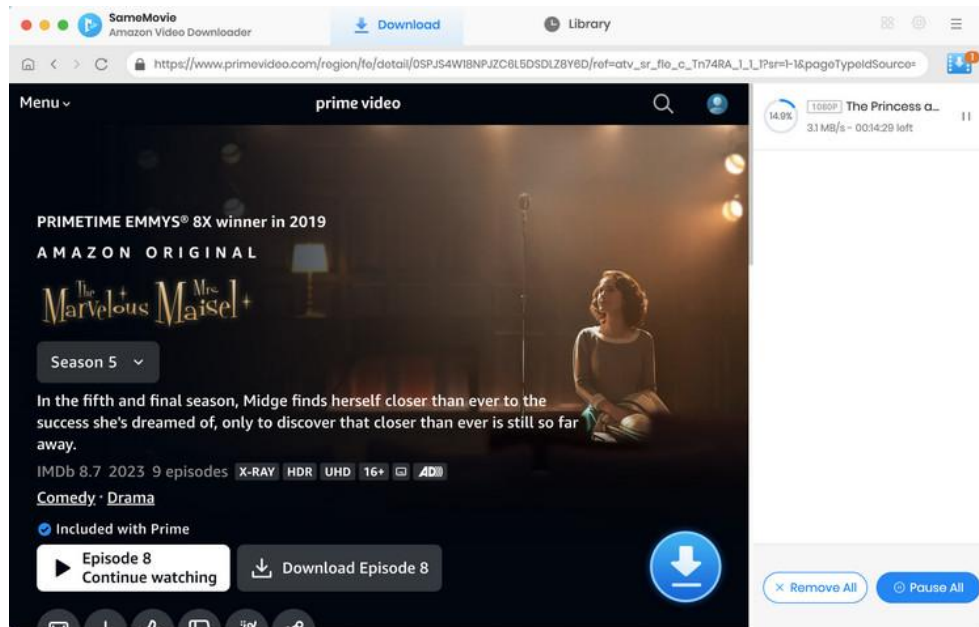

When downloading movies, you directly select specific video quality with different bit rate, as well as the languages of audio tracks and subtitles. For TV shows, after selecting the episodes that you want to download from the pop-up window, click the **“Advanced Download”** button to select the advanced download settings.

## Step 5: Download Amazon Video

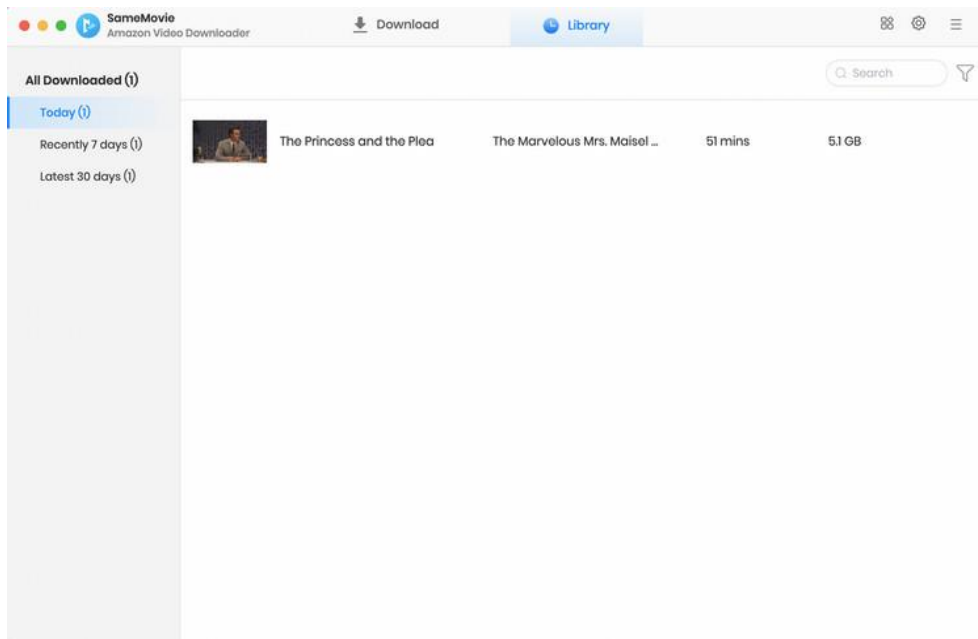

Click the **“Download”** button to start downloading videos. The program will download the selected videos to the computer one by one.

## Step 6: Check Download History

After downloading, you can check the downloaded videos by clicking the **“Library”** tab. Here you can find the record of all video files.
